## Release Notes – Stream v6.6.0

---

Stream solutions are helping thousands of users communicate efficiently, effectively and faster than ever. The bottom line is Stream solutions have a huge impact on organizations - saving time and money in a very sustainable way. Stream solutions seamlessly integrate and streamline voice, fax, and email communications. With feedback and input from our customers, we're pleased to announce enhancements and new features that will help you do even more!

The enhancements found in Stream v6.6.0 include improved customization and flexibility in Stream Fax™ network fax, Stream Alert® notification and Stream Connect™ multifunction device integration. You'll find new easy-to-use features and functionality that will save you time and money, and allow you and your teams to do even more – to focus on *your* customers, suppliers, and partners. Check out the highlights of Stream v6.6.0 below...

### Increase Security & Management with Stream Fax

---

#### Make every fax retrievable in seconds.

Improve visibility and track your communications, page-by-page, with an enhanced, electronic fax stamp.

**NEW!** Whether you are an administrator or a user, you can easily view details and status of sent and received faxes with Inbox and Outbox automatic archiving.

**NEW!** Make existing faxes work for you. Stream's powerful history feature lets you retrieve and edit fax documents, and resend faxes – all in one place.

#### Secure access to faxes to maintain compliance from start to finish.

**NEW!** Comply with regulatory standards and secure your fax by receiving instant email notifications including an inbound fax link to a secure network folder, web page or document management system.

#### Apply time-saving tools with Stream Print.

**NEW!** Ensure you are running on the latest software version and have the latest resources, including company-wide contact lists and cover page templates – updates are sent automatically.

**NEW!** Save time by creating cover page templates with auto-populated fields for quick and easy reuse.

**NEW!** Protect your faxes and ensure speed of delivery for large attachments with FTP and FTPs communications. Send faxes with increased security to meet regulatory compliance and standards.

**NEW!** Installation and rollout in an instant – set up the installation file on the system and implement without installing on each computer.

## Save Time and Improve Communications with Stream Alert

---

### Increase efficiency and add convenience with express messaging.

Flexible one-click access to targeted messages with easy-to-use, editable message templates - no limitations on the quantity of templates.

**NEW!** Faster broadcast set-up and delivery in 3 simple steps – all from a single page.

**NEW!** Less preparation and training time with pre-determined distribution methods (phone, cell, fax, email, pager) based on pre-configured default message and list options.

**NEW!** Convenient scheduling of broadcasts, with the added ease of viewing and editing pending and completed broadcasts, and resending completed broadcasts – all in one place.

### Improve customer relationships and focus on core responsibilities.

**NEW!** Improve communication and management of information, and make the opt-in experience seamless by having contacts login to a web page that looks like yours to easily add themselves to your list.

## Improve Reporting & Document Management with Stream Connect

---

### Greater flexibility without sacrificing security and control.

**NEW!** Increase the security and flexibility of the documents you send with multiple distribution options via integration with the Xerox Extensible Interface Platform (EIP).

Improve reporting, archiving and audit trails, and reduce paper usage with flexible, comprehensive options that integrate with your existing network folders, document repositories, and document management systems.

## Take Advantage of 6.6.0. Get Ready to Upgrade Today!

---

Stream continues to offer best-in-class Support. If your company is taking advantage of our Support and are currently under contract, you are eligible to upgrade to Stream version 6.6.0 at no charge, provided your existing software is within the current version (6.5.0 – 6.5.9) of the software purchased and your existing hardware meets the specification requirements. If you have software below v6.5, are not under a current support contract, or you have dated hardware, you may still be able to take advantage of the enhancements in v6.6.0. Find out if you are eligible to trade-in your existing hardware and software (additional charges may apply).

To find out how you can upgrade and take advantage of all of the above enhancements, added features and functionality, contact Stream Sales at 800-325-7732 or [streeminsales@cleo.com](mailto:streeminsales@cleo.com).
